

Majoni Bow, dumpy, anchor and ring fenders

The fenders are made of durable synthetics, so after long and intensive use they keep their effects. All fenders have sunken valves. Due to the low price, high quality and practical design these Majoni fenders are very popular articles.

Recommended pressure: 0,2 bar

Pos.	Description	Colour	Dimensions (cm)	Cat. no.
1	Bow fender	dark blue	9 x 70	0472
-	Bow fender	very dark blue	9 x 70	0466

3	Jetty fender Straight	dark blue	10 x 50	0479

Adapter valve for fenders

With the adapter valve you can easily pump your fenders with your bicycle pump. Recommended pressure for fenders = 0,2 Bar.

Description	Cat. no.
Adapter valve to pump your fender with a bicycle pump	0498
Fender valve	0499

Fenderfits

For ball and cylinder fenders

Especially in the summer, the fenders often have a sticky surface, which melt and rub off onto the skin of your boat. This sticky surface collects dirt and the skin (and your fender) becomes grimy and rough. The durable fenderfits protect your vessel and the fender against dirt and damage. Another advantage is the elimination of the irritating fender "squeak".

Most fenderfits are supplied per two pieces. The fenderfits can be hand washed on 30°C. Available for ball and cylinder fenders.

For fender	Dimensions fender (cm)	Colour fenderfit	Number	Cat. no.
Ball fender 35	35 x 48	dark blue	2	A2NB
Ball fender 45	45 x 62	dark blue	2	A3NB
